Subject: RE: status of CA725 for Navy-Grumman Bethpage

Thank you Henry. This is very helpful. Even though your message indicates that the CA725 cannot be done by March 31st, it is good to hear that a lot of work is going into the much-needed investigations.

FYI, I am copying Adolph Everett and Ben Conetta (the new RCRA section chief) on this e-mail, as they have asked me about the status. I'm also copying Steve Karpinski.

Thanks again,
-Carol-

Carol,
We have so many gaps. I already moved the CA725 to September 30, 2015.
At the moment, I'm reviewing every information (Soil & GW) at each parcel. I have already 4 parcels (Plant 14, Plant 15, Plant 26, Drop hammer) under need soil investigation.

Subject: FW: status of CA725 for Navy-Grumman Bethpage

Good afternoon Steve and Henry - I was wondering if the scenario, below, is still an issue. Is the CA725 determination still scheduled to be completed by March 31st?
Also, I was wondering if the soil contamination at properties south of Bethpage park would impact the CA725 decision?

Thanks,
-Carol-

FYI. Although plans are underway to complete the CA725 determination by March 31st, there is a roadblock that I wanted to bring to your attention. DEC is asking Northrop-Grumman for soil information for 7 to 8 parcels of property that had been sold to others after the plant closed. We don't expect there to be a problem with the soil, but if there is one, the CA725 would not be achievable by March 31st. DEC and Northrop-Grumman are scheduled to meet March 4th or earlier on this. I will keep you posted.
